

### Enhanced Repository Manager for Mission Critical Development

Sonatype Nexus™ Professional (Nexus Pro), an enhanced version of the world's most widely used repository manager, includes expert support and the critical features you need to build better software faster.

Starts at  
\$120/user

#### With Nexus Pro, you'll:

- Ensure support is there when you need it
- Manage Java, .NET, and OSGi components
- Avoid component licensing and security issues
- Ensure continuity of operations
- Integrate with enterprise security systems
- Improve quality by controlling and staging releases

#### Why Go Pro?

- ✓ Expert technical support from the creators of Nexus and Apache Maven
- ✓ Eliminate downtime using a highly available repository configuration
- ✓ Deploy multiple proxies without performance degradation
- ✓ Understand licensing and security details for all your open source components
- ✓ Avoid problematic components by controlling open source downloads
- ✓ Easily share your own Java, .NET, and OSGi components within your organization
- ✓ Enforce a workflow for components through development to QA and production
- ✓ Control user access with LDAP and Atlassian Crowd support
- ✓ Improve developer productivity with enhanced collaboration and search capabilities
