

**August 2013** | Repo highlights about all things Nexus

## PRODUCT UPDATES

### Nexus Pro CLM Edition:

Learn more about the Nexus Pro CLM Edition and take advantage of defining rich policies to improve your release process with the Nexus staging suite integration. Never release an application with license or security issues again.

[Read More »](#)

---

### Just Released, Nexus 2.6:

Upgrade worthy and here's why: Java 7 is now the defacto runtime, added support for separate proxy servers from http and https urls, significant performance enhancements and extended support for P2 group repositories, YUM repositories and NuGet repositories.

## DEV RESOURCES

### Nexus Pro Trial Guide and Installer Updates:

To streamline your [trial experience](#), we've bundled example projects and new samples for Ant/Ivy and Gradle. Don't start from scratch, use these samples to quickly demonstrate the value for going Pro. In the mist of your trial already? Download the samples [here](#). And don't forget about all the great stuff in the [trial guide](#).

---

## Share your love for Nexus:

Lend your expertise to others. Take this [presentation](#) and use it to share best practices, tips and tricks for using a repository manager. If you have questions or comments on the presentation, [reach out to us](#) anytime.

### EVENTS

#### Nexus Live:

Join us for live demos and discussions about the most powerful features and functions of Nexus. We welcome all Nexus users to share your savvy skills and stories on how you're mastering Nexus in your organization.

[Join Now »](#)

---

#### Nexus Pro: Build Promotion Enhancements:

How can you get your peers using Nexus to automate policies to guide and speed development? [Watch this recording](#) on how Nexus Pro CLM offers an integrated policy enforcement approach that leads to high quality, trusted production applications.

---

#### Nexus and Maven training:

Reserve a day with one of our seasoned experts. Sign up for a paid training day and learn how to maximize your use of Nexus and Maven in your organization.
