

October 2013 | Repo highlights about all things Nexus

## INSIDE SCOOP

### And the Nexus Pro Survey Says:

Interested to know what the typical Nexus environment looks like, what IDEs, CI servers, repository formats and build tools are used most? How large and distributed the development teams are? Or how over 45% of organizations recognize the need to extend component management beyond the Nexus repository? View these slides to find out what the most underused but greatest Nexus features are.

---

### No rules, restrictions or word count, you define the topic:

"Where would you work, if you weren't an IT Professional?" A question we recently posed to our Nexus users and 47% of them said 'teacher'. Maybe because many of us enjoy teaching our kids, colleagues and friends but here's your chance to do more. **Share your Nexus expertise as a guest blogger** by either drafting a post to submit or by participating in an interview to teach others your Nexus tips and tricks.

## DEV RESOURCES

### Simplified Releases to the Central Repository with Nexus:

The Central Repository is the largest repository for Java developers, the built-in

default for Maven and well supported by other tools like Gradle, Ant/Ivy and SBT. The Sonatype Open Source Software Repository Hosting OSSRH and Nexus are the input funnel for the Central Repository taking advantage of the staging features of Nexus Professional. Read more about how you can simplify the usage and use the same release approach in your own Nexus Pro instance.

## EVENTS

### **October Nexus Live: October 23rd at 12 EDT**

Join us every month for a live discussion with Nexus product experts and Nexus community members talking about component based development trends, tools and techniques. This month we'll be joined by Director of Engineering at Hubspot to talk about the integration of Nexus we jointly developed and their Nexus use case.

If you're interested in joining the panel discussions, be sure to reach out to us.

### **Nexus Webinar Series: Speed and Control for Modern Development:**

Our new Nexus webinar series kicked off to great success! In Part 1 we walked through scenarios of how organizations are using the most valued features of Nexus including smart proxy, security capabilities, Repository Health Check and build promotion and staging. If you missed it, check out the recording.

### **The Golden Repo is NOT the Answer: October 16th at EDT**

Part 2 will explain the 'golden repository' methodology and highlight the flaws to this approach. [Read this blog](#) to learn where the golden repo went wrong and how the right repository approach can improve component governance. Join this webinar to learn about how to move to the 'Golden Policy' approach to help inspect all of your components all of time.

### **Yes, Policies Can Speed Development: November 6th at 12 EDT**

Part 3 will show how policies and restrictions don't have to be all bad for developers. Learn how policy enforcements points can in fact be helpful and just work seamless in the background without interfering with your development process.
