

Sonatype IQ Cloud Migration Services

A structured, expert-led engagement that supports migration from self-hosted Lifecycle or Repository Firewall (IQ Server) to Sonatype IQ Cloud. This service guides a smooth transition to a fully managed cloud platform, including SSO integration and configuration alignment, with documented results and a clear path to long-term ownership.

Key outcomes and benefits

- ✓ **Faster time-to-value:** Accelerate migration to IQ Cloud through a structured approach.
- ✓ **Reduced risk:** Minimize downtime and configuration issues with planned execution.
- ✓ **Operational readiness:** Deliver configured environments and documentation for long-term ownership.
- ✓ **Integration confidence:** Review integrations and align them to the target cloud environment.

About Professional Services

Sonatype Professional Services deliver expert-led engagements that accelerate adoption, reduce risk, and drive measurable outcomes.

What you can expect

- Structured, outcome-driven delivery
- Expert guidance throughout
- Documented results
- Clear handoff for ownership

Sonatype IQ Cloud Migration Services

Migration Services support the transition from self-hosted IQ Server environments to Sonatype IQ Cloud. Sonatype provides structured guidance for migration planning, SSO configuration, and environment alignment while the customer manages infrastructure. The result is a smooth transition with documented outcomes and a clear path to long-term ownership in Sonatype IQ Cloud.

We don't just migrate your data, we enable your transition to Sonatype IQ Cloud!

PHASE I

Migration Discovery

- Review environment and integrations
- Define scope, approach, and timeline
- Align stakeholders

PHASE II

Assessment & Planning

- Evaluate configurations and dependencies
- Define migration approach and checkpoints
- Develop migration plan

PHASE III

Execution & Configuration

- Perform staged migration to IQ Cloud
- Configure SSO and access controls
- Review integrations and workflows

PHASE IV

Validation & Cutover

- Validate access, workflows, and integrations
- Document findings and readiness
- Execute controlled cutover and transition to ownership

Delivery Timeline

- ✓ **Standard duration:** typically 1–3 months (staged migration with checkpoint-driven progress)
- ✓ **Engagement model:** 1–2 weeks of direct specialist involvement across key milestones
- ✓ **Delivery model:** virtual by default; on-site not applicable
- ✓ **Planning:** confirmed during discovery with milestone checkpoints

Success Criteria

- IQ Server migration to IQ Cloud completed
- Data and configuration results documented
- SSO integration configured
- Integrations reviewed with recommendations
- Handoff completed with migration documentation

Customer Responsibilities

- Provide required data and access
- Assign a project owner and ensure participation
- Participate in migration planning
- Own operations after handoff
