Sonatype Lifecycle/Repository Firewall Optimization Assessment

Optimization Assessments cover existing Lifecycle and Repository Firewall deployments. Sonatype assesses configuration and policy enforcement against recommended practices, delivering documented findings and prioritized recommendations for improvement.

We don't just review your environment, we deliver actionable insights that drive improvement!

PHASE I

Discovery

- Define roles and responsibilities
- Review usage, policies, and configuration
- Identify risks, requirements, and constraints

PHASE II

Review & Analysis

- Assess configuration, policy enforcement, and architecture
- Review performance, security, and governance
- Identify optimization opportunities

PHASE III

Findings & Recommendations

- Provide prioritized recommendations
- Document gaps, risks, and opportunities
- Align findings with recommended practices

PHASE IV

Optimization Report Delivery

- Deliver the Optimization Report with next steps
- Present findings and recommendations
- Confirm understanding and planned actions

Delivery Timeline

- ✓ **Duration:** typically 1–2 days
- ✓ **Delivery model:** virtual by default; limited on-site available if scheduled in advance
- ✓ **Planning:** confirmed during discovery

Success Criteria

- Policies, configurations, and integrations reviewed
- Findings and recommendations documented
- Optimization Assessment Report delivered
- Review session completed with documented outcomes

Customer Responsibilities

- Provide access to the LC/FW environment
- Assign a project owner and ensure participation
- Participate in assessment and review sessions
- Own operations after handoff

Sonatype is the software supply chain management company. We enable organizations to innovate faster in a highly competitive market. Our industry-leading platform empowers engineers to develop software fearlessly and focus on building products that power businesses. Sonatype researchers have analyzed more than 120 million open source components – 40x more than its competitors – and the Sonatype platform has automatically blocked over 115,000 malicious components from attacking software development pipelines. Enabling high-quality, secure software helps organizations meet their business needs and those of their customers and partners. More than 2,000 organizations, including 70% of the Fortune 100 and 15 million software developers, rely on our tools and guidance to be ambitious, move fast and do it securely.
