

Sonatype Lifecycle/Repository Firewall Optimization Assessment

A focused professional services engagement led by Sonatype experts that assesses your existing Lifecycle and Repository Firewall deployment. This expert-led, outcome-driven service reviews configuration, policy enforcement considerations, and performance considerations while providing defined recommendations to support improvement. The engagement concludes with a documented Optimization Report reflecting current governance and security practices and their alignment with Sonatype recommended practices.

Key outcomes and benefits

- ✓ **Rapid insight:** Focused review to identify risks, gaps, and opportunities.
- ✓ **Actionable recommendations:** A prioritized roadmap with recommendations to support improvements in policy enforcement, performance considerations, and governance.
- ✓ **Risk awareness:** Identify potential scaling issues or misconfigurations that may affect operations.
- ✓ **Operational confidence:** Review configuration and alignment with Sonatype recommended practices.

About Professional Services

Sonatype Professional Services help organizations accelerate adoption, reduce risk, and pursue measurable outcomes with confidence.

What you can expect

- Accelerated value: reduced time to production
- Reduced risk: proven frameworks
- Customer ownership: documentation for long-term ownership
- Flexible offerings: deployment accelerators, continuity planning, health checks (where applicable)

DURATION

1-2 days,
expert review

SCOPE

Expert review,
config and usage

OUTPUT

Formal Report,
and roadmap

Who should engage?

Organizations looking to:

- Review existing Lifecycle and Repository Firewall deployments.
- Evaluate configuration alignment with recommended practices.
- Identify risks prior to scaling, upgrades, or migrations.
- Establish a foundation for long-term operational use.

Recommended roles

- System Administrators
- DevOps Engineers
- Architects
- Technical Program Managers

Related products

Sonatype Lifecycle/Repository Firewall Optimization Assessment

Optimization Assessments cover existing Lifecycle and Firewall deployment only. Sonatype experts assess your configuration and policy enforcement against best practices, providing clear documentation and prioritized recommendations for improvement.

We go beyond review to give your team actionable insights that support improvement!

PHASE I

Discovery

- Define team roles and responsibilities
- Review existing usage patterns, policies, and configurations
- Identify requirements, risks, and constraints

PHASE II

Review & Analysis

- Assess architecture, configuration, and policy enforcement
- Review performance, security, and governance considerations
- Identify scaling considerations and potential misconfigurations

PHASE III

Findings & Recommendations

- Provide prioritized recommendations for optimization
- Document gaps, risks, and opportunities for improvement
- Align findings with recommended best practices

PHASE IV

Optimization Report Delivery

- Deliver the Optimization Report with defined next steps
- Present findings and recommendations to stakeholders
- Provide understanding of findings and planned next steps

Delivery Timeline

- ✓ **Standard duration:** 1 to 2 days of concentrated expert engagement
- ✓ **Delivered virtually by default:** on-site engagement available if requested
- ✓ **Timeline tailored during discovery:** includes discovery, live review, and a formal Optimization Report delivery

Success Criteria

- Policies, configurations, and integrations have been reviewed and analyzed
- The Optimization Assessment Report and Optimization Roadmap have been delivered
- The review session has been completed, including applicable assessment documentation

Customer Responsibilities

- Provide assessment access to the Lifecycle and Repository Firewall environment
- Assign a project owner and support participation
- Own post-engagement operations

Sonatype is the software supply chain management company. We enable organizations to innovate faster in a highly competitive market. Our industry-leading platform empowers engineers to develop software fearlessly and focus on building products that power businesses. Sonatype researchers have analyzed more than 120 million open source components – 40x more than its competitors – and the Sonatype platform has automatically blocked over 115,000 malicious components from attacking software development pipelines. Enabling high-quality, secure software helps organizations meet their business needs and those of their customers and partners. More than 2,000 organizations, including 70% of the Fortune 100 and 15 million software developers, rely on our tools and guidance to be ambitious, move fast and do it securely.
