

# Sonatype Repo Cloud Migration Services

A structured, expert-led professional services engagement that supports migration from self-hosted Nexus Repository or JFrog Artifactory to Sonatype Repo Cloud. This service supports a smooth transition prepared for production use on Sonatype's fully managed cloud platform. The engagement includes migration planning, data validation, and documentation to support customer readiness and long-term ownership.

## Key outcomes and benefits

- ✓ **Faster time-to-value:** Support migration from self-hosted repositories to Sonatype Repo Cloud through a structured, expert-led process.
- ✓ **Risk reduction:** Reduce the risk of downtime and misconfiguration through structured migration planning.
- ✓ **Operational readiness:** Deliver documentation and configurations validated for production readiness to support long-term ownership.
- ✓ **Integration confidence:** Review integrations and provide recommendations aligned with the target cloud environment.

## About Professional Services

Sonatype Professional Services help organizations accelerate adoption, reduce risk, and pursue measurable outcomes with confidence.

## What you can expect

- Accelerated value: reduced time to production
- Reduced risk: proven frameworks
- Customer ownership: documentation for long-term ownership
- Flexible offerings: deployment accelerators health checks (where applicable)

## ESSENTIAL

**Self-hosted**, Repo  
or Artifactory  
(6-20 TB)

## STANDARD

**Self-hosted or  
SaaS**, Artifactory  
(20-35 TB)

## ENTERPRISE

**Large and  
complex**, Repo  
and Artifactory

*Sonatype will help identify the right tier for you using our readiness checklist.*

## Who should engage?

Organizations looking to:

- Migrate from self-hosted repositories to Sonatype Repo Cloud.
- Simplify operations through repository consolidation.
- Support governance and scalability in a managed cloud environment.

## Recommended roles:

- System Administrators
- DevOps Engineers
- Architects
- Technical Program Managers

# Sonatype Repo Cloud Migration Services

Migration Services support customers transitioning existing Nexus Repository or JFrog Artifactory environments to Sonatype Repo Cloud. Sonatype Migration Specialists support migration planning, execution, and validation activities, including configuration alignment and data validation, to prepare the environment for production use in Sonatype Repo Cloud.

**We don't just move your data, we help establish long-term ownership in Sonatype Repo Cloud!**

## PHASE I

### Migration Discovery

- Review the current repository environment, data volume, and integrations
- Define migration scope, objectives, and requirements
- Support engagement preparation through stakeholder alignment

## PHASE II

### Assessment

- Evaluate configurations, formats, and integrations to identify risks and dependencies
- Document a migration plan, including checkpoints

## PHASE III

### Migration Execution & Configuration

- Engineer-led execution of repository and configuration migration
- Review CI/CD integrations and provide configuration recommendations

## PHASE IV

### Validation & Cutover

- Validate data, access, and repository functionality
- Document findings and prepare for cutover
- Support operational readiness prior to transition to customer ownership

## Delivery Timeline

- ✓ **Standard duration:** Standard: 4–6 weeks | Advanced: 6–8 weeks | Custom: 8+ weeks
- ✓ **Delivered virtually:** all engagements are conducted remotely with structured sessions and milestone reviews
- ✓ **Timeline tailored during discovery:** includes milestone-based checkpoint reviews

## Success Criteria

- Repositories and configurations have been migrated to Sonatype Repo Cloud with data accuracy and access validated
- Data validation and configuration accuracy have been documented
- CI/CD integrations have been reviewed and documented with recommendations
- The handoff session has been completed, including applicable migration documentation

## Customer Responsibilities

- Provide repository details and required migration inputs
- Assign a project owner and support participation
- Participate in validation and decision-making during migration
- Own post-engagement operations

Sonatype is the software supply chain management company. We enable organizations to innovate faster in a highly competitive market. Our industry-leading platform empowers engineers to develop software fearlessly and focus on building products that power businesses. Sonatype researchers have analyzed more than 120 million open source components – 40x more than its competitors – and the Sonatype platform has automatically blocked over 115,000 malicious components from attacking software development pipelines. Enabling high-quality, secure software helps organizations meet their business needs and those of their customers and partners. More than 2,000 organizations, including 70% of the Fortune 100 and 15 million software developers, rely on our tools and guidance to be ambitious, move fast and do it securely.
